

R100EQ is an equalizer box for Active Audio's RayOn 100 column loudspeaker.

This equalizer delivers two equalization curves presented on figure below (left).

The red curve, with reinforced bass frequency is suitable for music, while the blue curve is recommended for speech signals.

The box is shipped fully working, and no parameter or control software is needed. See figure below (right) for the exact signal path.

Characteristics	
<b>Inputs</b>	2x Analog Audio Balanced inputs, plug-in terminal block type
<b>Outputs</b>	4x Analog Audio Balanced output, plug-in terminal block type
<b>Clipping</b>	±5.6V (14dBu)
<b>Range</b>	> 98dB
<b>Power supply</b>	12VDC (200mA Max)
<b>Dimensions (H x W x D)</b>	16mm x 75mm x 110mm
